

We've got this in the bag!

Midlab has the answer **IN THE BAG** for saving you money and maximizing your storage space:

FLEXMAX™
PACKAGING

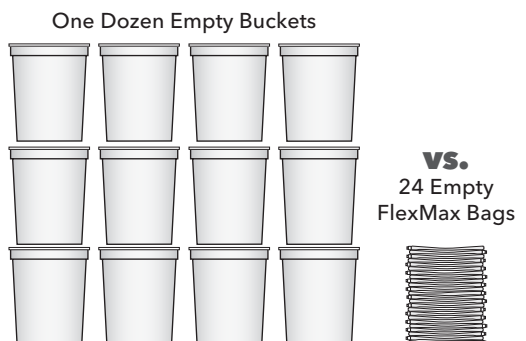

FlexMax Packaging replaces bulky, clumsy buckets with a container that empties completely and collapses to nothing. Yet it's still durable, and portable thanks to built-in handles. And... FlexMax Packaging is available for a number of Maxim products.

FlexMax bags are packaged 2 per box for easy storage and handling

The flexible option to replace bulky containers

- ✓ Reduces waste
- ✓ Reduces costs
- ✓ Uses up to 38% less storage space

Which would you rather deal with?

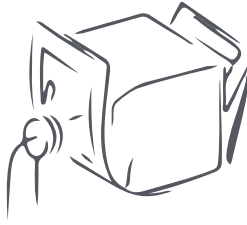

The Advantages of Being Flexible

Sturdy, stable construction

Easy to transport with handle

Ergonomic design pours easily

Empties completely

Collapses flat for disposal

Products in **FlexMax** packaging are easy to use, convenient to store, and cost efficient to ship. They're durable, lightweight, and... just like this flyer... collapse down flat.

Better for you. Better for the environment. Better for us all.

Sustainability Information

as compared to conventional rigid buckets

Material Weight	= 65% less
Total Energy Expenditure	= 60% less
Greenhouse Gas Emissions	= 30% less
Post-Consumer Solid Waste	= 65% less

- ✓ Easy to use
- ✓ Convenient built-in handles for easy carrying
- ✓ Less product waste because bags can be emptied completely
- ✓ Smaller carbon footprint
- ✓ Reduces material and shipping costs
